Why are we doing this?

We understand the challenges agencies currently face with budget cuts, reduction in personnel, and being **asked to do more with less**. FileOnQ wants to provide agencies with a system that will streamline evidence management, eliminate repetitive work effort, and save time and money...without tapping into their budget. We will help agencies escape the **tight budget box!**

How can we make this happen?

FileOnQ and PropertyRoom.com have a partnership that enables **qualifying** agencies to use auction proceeds to pay for the use of EvidenceOnQ (A one time implementation fee may be required for smaller agencies).

Here's How It Works: Your department signs an agreement with PropertyRoom.com to handle your auctions. They send the proceeds from your auctions directly to FileOnQ. In the end it allows you to easily manage and purge property and have a state-of-the-art evidence management system... **It is a Win-Win situation!**
