

# Having Trouble Managing YOUR Property Room?

## Consider This:

“Property rooms can make or break a police department. A lot of agencies do nothing, until something happens... and by then it is too late.”

-- John Vasquez, President of TAPEIT

## What is EvidenceOnQ

EvidenceOnQ™ is a flexible user-friendly evidence management system that is designed to help you manage property and evidence throughout its entire life cycle. EvidenceOnQ™ is a versatile off-the-shelf system that follows your own workflow, uses your own terminology and gives you complete control of the design and layout of your home screen.

### The Crime Scene:

The flexibility and power of the EvidenceOnQ™ system allows you to start capturing evidence right at the crime scene.

### The Property Room:

With its intuitive, configurable and simple design, it provides instant control of evidence and access to information quickly and easily.

### The Court Room:

An unalterable chain of custody will provide integrity in court and give management peace-of-mind.

## WHY Agencies Choose EvidenceOnQ

**Time Management** — EvidenceOnQ™ will automate every aspect of evidence management such as data entry, evidence retrieval, searches, and purges.

“We used to dedicate 4 people to process the incoming evidence. It took them about 7 hours each day. Three weeks after installing EvidenceOnQ, it was reduced to 2 people spending about 90 minutes.”  
—Darrell Allen, Supervisor, San Antonio PD

**Chain of Custody** — OnQ provides an unalterable chain of custody. Dates, times, and transactions are not subject to human error or manipulation.

**Performing Searches** — Every field on the home screen is searchable, allowing for ANY combination of search criteria.

**Producing Reports** — EvidenceOnQ™ will produce forms and letters automatically in any format. Forms such as letters, receipts, property sheets, and lab forms are produced by the system.

**Audits and Inventories** — Are now streamlined by providing information immediately rather than going to paperwork and case files for information.
