YOU asked...WE listened!

Desktop 6.0 is all about you! It is about giving you the very best solution possible along with making every aspect of managing your property & evidence a better experience. Desktop 6.0 is about giving you the features **you have been asking for**. It is also about giving you all those features at one discounted price.

Therefore, we have intentionally built Desktop 6.0 to include the top most requested features from over 200 agencies. We have also slashed the price to \$4,500 which is a **50% savings** for current maintenance and support customers.

*Take advantage of this discounted price today!
This offer will not last long.*

Vista & Windows 7 Compatibility

We are offering a better experience for your IT staff by making our product 100% Vista and Windows 7 compatible. So when it comes time to upgrade your department or agency FileOnQ is ready. So, no matter if your IT staff chooses to go with Vista or Windows 7 you will be ready to go with Desktop 6.0.

Retention Codes

Batch Update Retention Codes

Now you have the ability to batch update your retention codes with just a few clicks of the mouse. No longer do you have to apply retention code changes one at a time. Changing or updating the retention for one item or thousands can be done in seconds.

Inventory

Inventory, Audits & Accreditation

One of the most requested features has been the ability to perform inventories with our system quickly and easily. We have answered by including a very easy to use and robust inventory solution. A solution that functions the way you want along with supporting your reporting, audit, and accreditation needs.

Auto Item Count

Auto Item Count

We have added the ability to automatically assign and preserve a unique and consecutive item number for each specific item within a case, even when items are added by multiple users concurrently.
